Hollywood DV-Bridge™

Universal Solution for Converting and Editing Analog and DV Video

With Hollywood DV-Bridge™, you can convert your old VHS tapes to high quality DV video. The video world is moving from analog to DV, and converting your video to DV ensures it will be around for the future in a standardized, high quality format. You can also convert your DV video to analog. This makes it easy to send video tapes to people with analog VCRs or camcorders. You can even take clips from your analog and DV tapes and combine them into one master production. With Hollywood DV-Bridge, you edit your video in the DV format which means you won't lose any video quality in the editing process. Hollywood DV-Bridge comes with Dazzle MovieStar 5 software for video editing, Dazzle DVD Complete software for DVD designing and burning and Dazzle OnDVD software for creating digital photo albums you can play on your home DVD player. Hollywood DV-Bridge is the universal solution for converting and editing analog and DV video.

Key Features

Capture Analog or DV Video

Hollywood DV-Bridge™ makes it simple to connect all your video devices. Connect an analog camcorder, TV, VCR or DV/D8 camcorder to capture video to your computer. (DV Capture on PCs only)

Edit in DV Format for Quality and Speed

Hollywood DV-Bridge converts video to the DV format for editing. Editing in DV ensures you will not lose video quality during the editing process and is faster than editing in other formats.

Convert Analog Video to DV

Hollywood DV-Bridge converts video from analog video to DV. DV is the format of the future. Archiving video in DV ensures it will be around in a standardized, high quality format. Make multiple copies of a DV video without losing video quality from one generation to the next.

Convert DV Video to Analog

Hollywood DV-Bridge converts video from DV to analog. Analog devices such as VCRs are the most common devices in the market so converting video to analog makes it easy to share video.

Convert Video Without a Computer

Connect an analog and DV camcorder to Hollywood DV-Bridge and you can convert from analog to DV and DV to analog without the use of a computer.

Monitor Video From a TV

Hollywood DV-Bridge makes it easy to view your video on a TV monitor while you are transferring it to the computer. No need to squint to see your video in a small box on your computer, see it in full screen on a TV to cue your video or to check out the quality.

Dazzle® MovieStar™ 5
Easy but Powerful Video Editing

MovieStar 5

Dazzle MovieStar 5 makes capturing, editing and sharing your video easy, but it doesn't leave out the powerful features you want. Cut out unwanted scenes, add 3D titles, transitions, background music, voice-over narrations and special effects. With MovieStar 5's custom video codecs, you always get the best video quality possible.

Dazzle® DVD Complete™
DVD Authoring and Burning Software

With DVD Complete™, it's easy to make DVDs like the ones designed in Hollywood movie studios. DVD Complete's project wizard guides you through the five simple steps to go from camcorder to DVD. All you need to know is what you like and DVD Complete will do the rest.

Dazzle® OnDVD™
Digital Photo Album Creation Software

Take your digital pictures and turn them into photo albums! Use OnDVD to create digital photo albums to be played on your DVD player. OnDVD makes it easy to turn digital memories into home entertainment!

Burn CDs and DVDs

Make DVDs, Video CDs, S-Video CDs or backup CDs with all your video footage and digital slide shows. CD/DVD Burner Required.

Output to Tape

After you edit your movies, record them back to video tape to watch on your VCR or camcorder.

Webcast Video

Free membership to the Dazzle Webcast Theater™. Post your videos and photo slideshows then stream them across the Internet to family and friends.
